

## **Summary**

Frontend Platform Engineer with experience in developing micro-frontend architectures and migrating legacy AngularJS apps to ReactJS, enhancing performance and platform adoption. Skilled in building custom libraries with a focus on TypeScript and technical documentation. Some experience in improving SEO and accessibility processes, and developing HTML/CSS emails for marketing campaigns.

## **Skills**

ReactJS | AngularJS | Material UI | Redux | Typescript | Javascript | HTML5 | CSS3 | SASS/SCSS | Git | Micro-Frontends | Webpack | Responsive Design | UI/UX | Figma | Email code | SEO | Accessibility (A11Y) | Agile | Jira

## **Experience**

### **Fiserv/Clover Network**

*Frontend Platform Engineer*

**Berkeley Heights, New Jersey**

*January 2023 - May 2024*

Internal Tools Platform:

- Played a key role in developing and iterating on a novel micro-frontend architecture, growing from implementation to co-ownership responsibilities. Micro-frontend platform supports highly independent tool development from different teams through one centrally accessible platform with legacy support
- Served as primary technical contact for stakeholders adopting the micro-frontend platform, guiding integration and assisting with code migration where teams lacked ReactJS expertise.
- Built custom libraries to fill redux/messaging and common functionality needs in internal tools platform, prioritizing first-class typescript support and technical documentation to assist developer adoption.
- Migrated multiple legacy AngularJS apps to ReactJS micro-frontend apps, resulting in significant performance improvements as well as furthering platform adoption

Reseller Support App:

- Spearheaded development of Multi-Factor Authentication management tools for third-party (reseller) support teams, resulting in a significant decrease in volume of tickets elevated to internal Clover support
- Developed user interfaces supporting an evolving billing system, as well as maintaining backwards compatibility for legacy and hybrid billing customers.
- Utilized Material UI to implement responsive designs from Figma, collaborating with stakeholders and design teams to iterate and improve UI/UX for end-users

### **Publicis Health/Heartbeat Ideas**

*Frontend Development Intern*

**New York, New York**

*June 2022 - September 2022*

- Collaborated with senior mentor to develop *SOAP*, a custom tool which grooms SEO and accessibility across project resources before marketing websites go live, reducing the process from days to hours
- Developed emails using HTML and CSS for pharmaceutical marketing campaigns
- Assisted with minor bug fixes and code changes across several pharmaceutical marketing websites

## **Education**

### **Santa Monica College**

*Associates of Computer Science*

**Santa Monica, California**

*September 2024 - Present*

### **Multiverse Technology Bootcamp**

*Certificate of Achievement*

**Remote**

*September 2022 - December 2022*

### **CUNY Hunter College**

*Bachelors of Computer Science (Partial)*

**New York, New York**

*September 2020 - September 2022*
